PROJECTS

Fallen Angel: Revenge Tour | Game Jam Project <https://github.com/ActuallySanta/Noiselam2026>

June-July 2026

- Created a 3D first person shooter roguelike in the Godot Engine with C# and GDScript
- Led a cross-functional team to create a game to develop a unique mixed media visual aesthetic that stood out from other entries in the 2026 Noise Jam
- Implemented the dungeon generation logic, menu system, and core player upgrading mechanic
- Designed all the unique rooms and imported them into the main project from an external program

Don't Lose Your Head | Game Jam Project <https://github.com/ActuallySanta/Scream-Jam-2025>

October 2025

- Developed a 2D sidescroller puzzle platformer using the the Unity Engine with C#
- Led a cross-functional team to create a game that scored in the top 50% of over 900 other submissions overall
- Implemented the player controller and camera system in a scalable manner such that my teammates could work off of it

Dungeon Raider | Academic Project <https://github.com/ActuallySanta/Dungeon-Raider>

February 2025 – May 2025

- Developed a 2D top-down action roguelike using the MonoGame framework with C#
- Led a cross-functional team using Agile methodologies to deliver a complete game project ahead of schedule
- Designed and implemented foundational systems and reusable UI tools, establishing development standards that enhanced project scalability and consistency

JOBS

Rochester Institute of Technology

Rochester, NY

Teaching Assistant

January 2026 – Present

- Coordinated with professor to establish grading norms and policies
- Lead a presentation on strong project management strategies to students
- Graded and gave feedback on multiple different assignments and homework
